WMT Wieland Metalltechnologie GmbH, Hans-Lingl-Straße 19, 86381 Krumbach

Krumbach, September 2024

## Information for our customers according to Article 33 of the REACH - Regulation and RoHs (2011/56EU, 2015/863EU)

Dear Ladies and Gentlemen

Again and again we receive enquiries regarding compliance with the requirements in relation to the above-mentioned regulations. We would like to comment on this as follows:

WMT GmbH is a manufacturer of turned parts according to customer specifications. The materials are specified by you, the customer, on the production drawings. Therefore, you are aware of the materials / ingredients. WMT GmbH does not have its own design and development department and is not responsible for the choice of materials.

Predominantly, "lead" as an alloy component is an issue in the parts we manufacture. In machining, lead is an alloy component added for machining optimisation. Annex II of the RoHS Regulation regulates the exceptions and these are also complied with in the materials we process.

The REACH regulation requires a concentration of max. 0.1 %. This is exceeded by most materials, e.g. 11 S Mn Pb 30, Cu Zn 39 Pb3.

We hereby inform you that products supplied by WMT may contain substances with a content of more than 0.1 %, which have been registered as SVHC identified substances.

Substance name	CAS number	EC number
Blei (Pb)	7439-92-1	231-100-4

Therefore, you as our customer are responsible for compliance with the above-mentioned specification via the drawing specification. If you have any requests for changes to the materials, you are welcome to submit them to us via the channels known to you. We will then be pleased to submit a suitable offer.

If you have any questions, please do not hesitate to contact us.

With kind regards

Sign. A. Donderer  
(Board of Management)
